WE ILLUMINATE

We define the light

LIK operates in the field of interior and exterior architectural lighting for the professional and private markets

The function of the room, the existing products, and the measurement of the room such as CRI, Kelvin, brightness and flicker are some of the important parameters in our observations and measurements.

Lighting has to be tailored to every room and function, from cozy and warm light at the dining-table, glare-free light at the computer screen, to flexible meeting-room lighting that adjusts for group discussions and presentations.

We design and deliver customized, high-quality lighting solutions that create identity, atmosphere and wellbeing.

We design lighting concepts based on our observations and lighting measurements of the room or building

We define the lighting concept and develop the design based on a minimum of 20 parameters. A LIK lighting design always recommends the optimal range of products, including light system and light sources. We prepare a complete solution including drawings and product list.

With more than 10,000 projects and a highly skilled team of lighting experts, LIK is your professional, dedicated partner for complete lighting solutions.

We collaborate with leading international lighting suppliers, carefully selected for their high quality and innovation.

CARS

The light for this showroom is an important investment, as tests shows that the intensity and color temperature inspire the costumer to stay longer. Our placement of direct and indirect light and point-shaped projectors highlights the cars surfaces and character and make them look like sculptures.

CASE DETAILS

- 36** Stella LED Pendant 200W 4000K
- 35** Ray Spot 55W 50/70° 3000K w/Barndoors
- 14** Turno LED Spot 23W 40° 3000K
- 45** Meters of Como2 LED Tubes 3000K
- 9** LED runner 31W 3000K
- 13** Taunus Pendel 13W24° 3000K
- 1** UHD Tv-skærm 86"

LIK LIGHTING

M[★]agasin

Our placement of the Invisua track light, creates the dynamic lighting setup in Magasins windows, where color and volume of light present a look so theatrical that people stops because of the entertaining show.

CASE DETAILS

34 Invisua master spot 80W

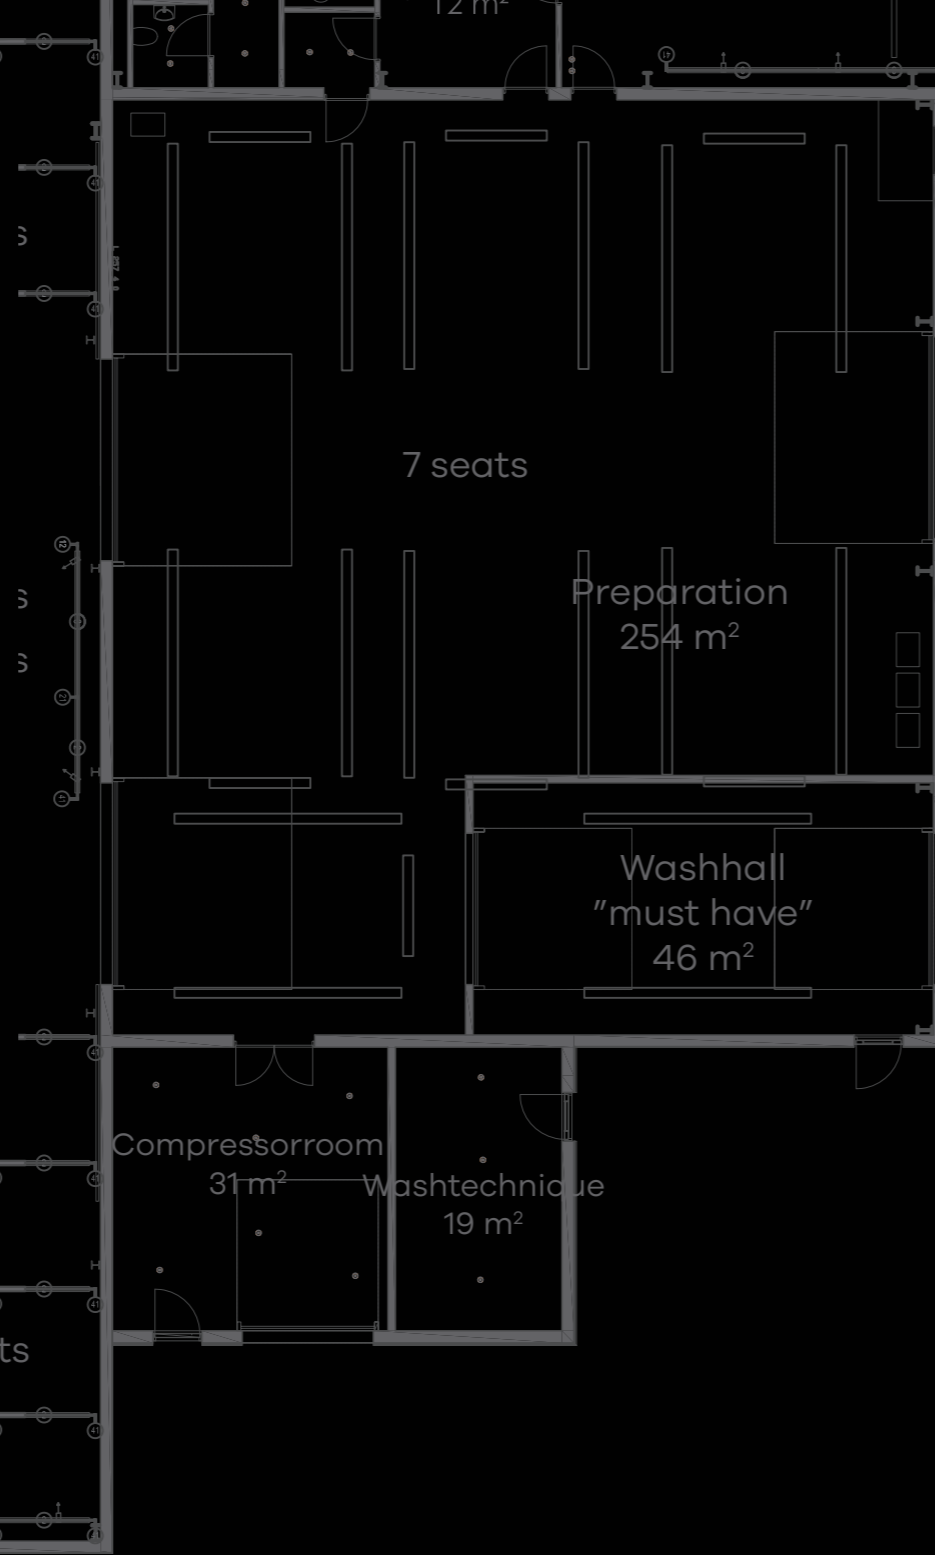

A total solution

Phase by phase LIK handles your light solutions with the highest professionalism

A LIK lighting design is a total solution. In close cooperation with the customer we define the lighting concept and develop the design based on a minimum of 20 parameters, from the function of the room, the installed products as well as other factors, such as CRI, Kelvin, brightness and flicker.

The Light Concept Model symbolises our approach to project management. Every light-project is steered professionally, phase by phase. We focus consistently on light design, quality, rapid implementation and on creating the right light solutions.

LIGHT CONCEPT MODEL

-  Define the light
-  Light concept
-  Light-design & development
-  Light-plan, drawings and product list
-  Proposal
-  Shipping and delivery
-  Installation on site

SKORINGEN

LIK has in cooperation with shoe-D Vision developed a light concept for Skoringen, which combines the light and furniture, into an inspiring and welcoming experience for the costumers. The light level are individual designed after the retail areas, which gives life and dynamic to the shop.

CASE DETAILS

- 33** Turno LED 13W 3000K
- 65** Meters of Como LED Tubes
- 4** Napoli LED downlight 26W

SKORINGEN CASE

LIK LIGHTING

LIK - Health

In harmony with the body's natural rhythm

Sunlight has a biological impact on our bodies. It controls our natural rhythm, and has a significant influence on our well-being, motivation and functional ability.

We spend nearly 90% of our time indoors, which means that for long periods we are exposed to artificial lighting. Daylight and artificial lighting must be adjusted in the right balance to ensure optimal illumination of the room or the building.

LIK – for a healthy lifestyle

We know how light influences the eye, the brain and the soul, and we understand that the right lighting contributes to a healthy lifestyle. Whether in the office, store, clinic, private home or any other room, quality lighting not only improves wellbeing, mood and productivity, it also helps to alleviate headaches, irritated eyes and fatigue.

Our LIK Health concept achieves this by analyzing over 20 parameters such as CRI, Kelvin, and brightness to deliver the health benefits that optimized lighting can bring.

Sunset products are designed based on Sunset's new image that will emphasize Coziness and simplicity. All products are designed in collaboration with the architect, to suit sunsets identity and function.

CASE DETAILS

- 84** Sunset LED Pendant 17W 3000K
- 107** Sunset LED downlight 17W 3000K
- 4** Projector With Gobo
- 58** Meters of LED strip in Alu Profile 3000K

WE ILLUMINATE

Teddy Bear
Art Museum

The light was used to show the journey from the beginning of the teddy and up to now. Furthermore, the light is forming an intimate and cosy feeling – like being at home. The location of each spot and light direction is creating an atmosphere where the visitors feel welcome and inspired.
